

SMART FASHION RECOMMENDATION APPLICATION

PROBLEM STATEMENT:

Mr. Abdul had a different fashion towards the way he looks and the way others look at him. He also had the fashion to order the products in the online. As he was ordering with his past orders he was upset due to the unfit of fashion the cloth look and the reached products. Hence he asked the employees under him to develop an application to fit his fashion.

- The way the items matches to the real images.
- The difference of the outlook to the items.
- The storage of most recommended items.
- He got the ideal of the present states in the fashion.
