PROJECT DESIGN PHASE - II
## Technical Architecture

Date	20 October 2022
Team ID	PNT2022TMID41254
Project Name	Smart Fashion Recommendation Application
Maximum Marks	4 Marks

Smart Fashion Application: -

As our lives are very busy these days, we often feel we need more than 24 hrs. a day to cope up with everything we have in our schedule. Well, that's not possible but reducing the time by changing the conventional method of most required purchase can help. Just tell us what market product you're interested and their effective cost and get a quick peek for the product. Only conform the product and make them yours. This app helps you to query for all information about the product and the details such as length, color, sizes and other effective information too in official websites.

Technical Architecture:

Project Workflow: -

- The user interacts with the application.
- Registers by giving the details.
- Integrate the application with product search APIs and store the data in the database.
- The database will have all the details and the user can search the product by using a search bar.
